Mission

Kamer Marble is dedicated to producing and exporting the Natural Stone with the highest quality standards and providing the best customer services by pursuing business through innovation and advanced technology.

Vision

Kamer Marble will be the preferred partner in natural stone business providing the highest quality and exclusive products that exceeds the expectations of our esteemed customers worldwide.

Kamer Marble has been established in 1989, is one of the leading companies of Turkish stone business and specialized in producing the premium quality slabs and finished goods of Turkish Marble & Onyx & Travertine from the finest quarries in Turkey.

Being an export-oriented company, Kamer Marble has already established a well-reputed name in the international market for its commitment in quality and exclusive stones.

The Goal is to supply the highest quality products and provide the best customer service to maintain maximum satisfaction. This has been approved by increasing number of customers in the world.

We are extremely proud to move into our newly factory with 26.000 M2 closed area starting from July 2021.

The new factory provides more space with the larger production and stockyard area and with additional dry lay area.

The larger, modern and high tech facility will allow us to continue producing great quality products, increasing in production capacity and customer satisfaction.

Advanced Technology

We are extremely proud to move into our new factory with 26.000 m² closed area in 35.000m² land starting from July 2021.

Before making this investment, there was 1 year planning stage to create the most efficient production with high-tech machineries and experted craftsmanship with 33 years experience on the business.

As a result of that, today Kamer is able to produce more then 140 different type of materials from all over the world and continuously increase the variety of the products and finishings to give the best service to the valuable partners from all over the world.

Hi-Tech Production

After 30 years experience and long time researching & planning, the new hi-tech factory able to produce event the most complicated materials from all around the world with high quality standarts
